

Is Your Church Reaching Single Adults?

- > Over half of the US population is now not married
- > Singles, never married make up the largest demographic
- > 1 in every 2 adults who walk through your church doors are single
- > Single adults include never married, divorced, widowed, and single parents, 18 to the grave.
- > Single adults are single due to choice, chance, change or someone else's choice.

Do single adults feel included in your church?

- > Many churches are marriage and family focus. We have to be intentional about reaching and connecting them to the local church body.
- > Some singles need direction, encouragement and hope in Christ.
- > Some singles come ready to serve, offering many gifts and talents
- > A majority of singles desire marriage, while many churches do very little to prepare them for marriage.
- > Jesus, the greatest single who ever lived shows us the impact a single can make in the world.

Let's reach single adults together.

Opportunity is there, what will you do?
